

Package ‘QuadRoot’

January 20, 2025

Type Package

Title Quadratic Root for any Quadratic Equation

Version 0.2.1

Author Pankaj Das [aut, cre] (<<https://orcid.org/0000-0003-1672-2502>>)

Maintainer Pankaj Das <pankaj.das2@icar.gov.in>

Description It will assist the user to find simple quadratic roots from any quadratic equation.

QuadRoot	<i>Quadratic Root for any Quadratic Equation</i>
----------	--

Description

It is used to find simple quadratic roots from any quadratic equation. This package follows the Sridharacharya method to solve a quadratic equation.

Usage

`QuadRoot(inputdata)`

Arguments

inputdata Coefficient vector of quadratic equation

Value

It returns quadratic roots of the equation

Author(s)

Pankaj Das

Examples

```
dataset=c(2,5,-3)
QuadRoot(dataset)
```
