The SVJour document class users guide supplement for the *International Journal on Digital Libraries (IJODL)*

19 Febrary 1998

1 Introduction

This document describes the *ijodl* option for the SVJour LaTeX 2_ε document class. For details on manuscript handling and the review process we refer to the *Instructions for authors* in the printed journal. For style matters please consult previous issues of the journal.

2 Initializing the class

As explained in the main *Users guide* you can begin a document for the *International Journal on Digital Libraries* by including

```
\documentclass[ijodl]{svjour}
```

as the first line in your text. All other options are also described in the main *User guide.*
