

The openmoji package (17.0.0a) – 2026/10/26

Cédric Pierquet

<https://openmoji.org> (Source version 17.0.0)

<https://github.com/cpierquet/latex-packages/tree/main/openmoji> (L^AT_EX package)

cpierquet – at – outlook . fr

This package provides L^AT_EX support for the openmoji project (<https://openmoji.org>).

A set of 4485 CC-BY-SA-4.0 licensed high-quality SVG/PDF icons for you to use in your web projects.

To use openmoji in your document, include the package with `\usepackage{openmoji}`.

An icon can be accessed using the icon name. A list of all included icons with their respective *page* can be found at the end of this document.

1 Example

```
...
\usepackage{openmoji}
...
\begin{document}
...
Inline\openmoji{adhesive bandage}version
...
\end{document}
```

Result: Inline  version

2 Usage

2.1 Generic macro

```
\openmoji[black=TF,height=..., (d)strut=...]<includegraphics options>{name}
```

The boolean `[black]` activate black version of icon (if available). And key `[height=...]` can be:

- `dauto` (by default): inline insertion with height/depth;
- `auto`: inline insertion with height/nodepth;
- `a length`: normal insertion with fixed height;
- `manuel height/depth`: normal insertion with fixed height/depth.

The keys `[(d)strut=...]` can be used to set the *reference* box for dimension calculations.

By default, icons are given with a small border, so the given height is the height of the *full* box, not the hight of the icons.

Example: Inline  version or inline  version

2.2 Examples

```
%normal version: inline with automatic height/depth (from qX characters)
\openmoji[height=dauto]{adhesive bandage} %or \openmoji{adhesive bandage}
```

qX

```
%normal version: inline with automatic height/depth (from specified characters)
(q\openmoji[height=dauto,dstrut=(qB)]{adhesive bandage}B)
```

(qB)

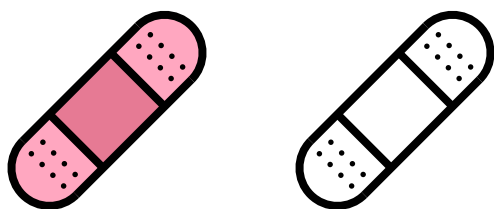

```
%normal version: inline with automatic height (from X character) default version
\openmoji[height=auto]{adhesive bandage}
```

XX

```
%normal version: inline with manual height/depth
\openmoji[height={0.8em/-0.4em}]{adhesive bandage}
```

qbXz

```
%fixed height
\openmoji[height=1.5in]{adhesive bandage}
\openmoji[black,height=1.5in]{adhesive bandage}
```

2.3 Used packages

graphicx is loaded and used by the package (the key handling relies on expl3, which is part of the L^AT_EX kernel since October 2020).

2.4 Bugs

For bug reports and feature requests, report on the GitHub repository <https://github.com/cpierquet/latex-packages/issues>.

3 List of icons

3.1 Color version (4485 icons)

The PDF file is openmoji-color-all.pdf

Direct command is: \openmoji{<Name>}.
