

NAME

archive_read_new — functions for reading streaming archives

LIBRARY

Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

```
#include <archive.h>

struct archive *
archive_read_new(void);
```

DESCRIPTION

Allocates and initializes a struct archive object suitable for reading from an archive. NULL is returned on error.

A complete description of the struct archive object can be found in the overview manual page for *libarchive(3)*.
